

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

II. *Part of a Letter from Mr. Nicolas Witsen, Burgermaster of Amsterdam; giving a farther Relation of the Horrible burning of some Mountains of the Molucco Islands.*

AT present nothing offers it self, except a farther Relation of the horrible burning of some Mountains of the *Molucco* Islands: whereof I formerly gave some account to a very Eminent Member of the *Royal Society*. Wherefore, I make bold to send you the true Translation of several Letters sent to me from those Parts by the last Ships. To which I add, That the Mountain *Kemas* or *Brothers*, in the Territory of *Manado*, is blown up with a most dreadful noise, as of the hardest Thunder, which caused Darknes and Earthquake, with very heavy Blows, and other dismal Signes at *Ternata*: which Noise hath also been heard at *Amboyna*. The Mountain of Brimstone upon *Amboyna*, called *Wawany*, does also burn dreadfully.

From all which it seemeth evident that in those Parts and Seas, there are Subterraneous Fires, having a mutual Communication one with another: Which God knoweth but may some time cause the sudden subversion of them, and consequently a notable Change or Alteration of the Worlds Globe. Those who have seen these things with their own Eyes, and are arrived from thence last Year have told me, that when a hole is made in the Ground 10 or 12 Foot deep, the Ground is warm.

And so after hearty Salutation, I remain,
Tours, &c.

is so intollerable, that one could scarce endure it in the Streets of *Neira*. The Noise continueth yet. How God Almighty will be pleased to dispose of us, is known to him alone.

It causeth a great Sickness on *Neira*: The Water which raineth down, is by reason of the Brimstone and Saltpeter become sower and without a natural tast. The Gardens which were on the *Gounong Apy*, and formerly brought forth great store of Fruits for Mans livelihood are partly covered with Stones, and partly Desert. The greatest fear is because it is consumed inwardly towards the old hole, which was blown up in the Year 1615, and because the Fire seemeth to take its course towards the South-West, and that it being quite hollow there will tumble inwardly, or be subverted. I have been as near the Fire as I could approach, but the excessive Noise, and casting of Stones made me draw back speedily.

Copy of a Letter Written by another Person from Banda, to the same Burgermaster.

THE Mount *Gounong Apy* keeps us still in a continual fear, bringing forth a Noise and Stones, and we see nothing but Fire and Flame, which is continually increasing. It casteth out Stones round about the Mountain, and the Fire ascendeth so high, that we can see it above the high Land at *Denter*, as it happened the sixth of this Month that the Stone and the Flame went up above the high Land, which was horrible to see.

Extract of another letter from the same place to the same Man.

WE are in fear because of the Mount *Gounong Apy*, which burning continually doth cast out so great a quantity of Fire and Ashes, that the Trees of the Country *Neira*, and part of those on the high Country of *Loutoir*, is so much covered with Ashes, that not one good Fruit is to be expected from them.

Copy of a Letter to the Burgermaster Witsen, from the Molucco Islands the 11th of June, 1695.

IT is almost impossible for me to give a particular account of the present state of *Banda*; for at *Neira* there is neither Leaf nor Herb. The Ground is covered with Stones and Ashes; the Trees look just as those of our Native Country in Winter; one half of the high Country is likewise in a sad condition, many Trees be wholly or partly dead, and the rest lingring. If we are to have such another West Monsoon, all will perish to which that Wind can reach. Not one House at *Neira* is demolished, several are quite without damage to the Ground by the weight of the Dust and Ashes; and if all hands had not been continually at work to take and carry it off, not one House had been left standing in *Neira*. One of my Houses is down. Those of *Denter*, *Weyer*, *Celam*, and the inward Coast, as far as *Waling*, have likewise a sad experience of this Calamity.

We are sometimes visited with Earthquakes; and especially on the 11th of *May*, about 2 a Clock in the Afternoon, we had two hard motions: Finally *Banda* meets with many Crosses.
